

Telco Customer Churn Dataset

KPIs and Visualization (Report)

Week one

Performance Metrics (KPIs)

KPIs Overview

Churn Rate: Approximately 27%

Retention Rate: -73%

Average Tenure: 32.37114866

FIVE BUSINESS INSIGHTS

- **Monthly contracts** show the highest churn compared to one-year or two-year contracts.
- **Electronic check payments** are strongly associated with churn, while auto-pay methods (credit card, bank transfer) have lower churn.
- **Fiber optic customers** churn more than DSL or no-internet customers, suggesting service quality issues.
- **Short-tenure customers** (less than 12 months) are far more likely to leave than long-tenure customers.
- **Add-on services** like streaming TV and online security influence churn — customers without add-ons tend to stay longer.

- **Monthly contracts** show the highest churn compared to one-year or two-year contracts.
- **Electronic check payments** are strongly associated with churn, while auto-pay methods (credit card, bank transfer) have lower churn.

- **Fiber optic customers** churn more than DSL or no-internet customers, suggesting service quality issues.
- **Short-tenure customers** (less than 12 months) are far more likely to leave than long-tenure customers.

- **Add-on services** like streaming TV and online security influence churn customers without add-ons tend to stay longer.

THREE BUSINESS RISKS

- **Revenue loss** from high churn in monthly contracts and electronic check payments.
- **Customer dissatisfaction** with fiber optic service could damage brand reputation.
- **Weak customer loyalty** among new customers increases acquisition costs and reduces lifetime value.

THREE BUSINESS OPPORTUNITIES

- **Promote annual contracts** to lock in customers and improve retention. Offer discounts or loyalty perks for upgrading to annual contracts.
- **Encourage auto-pay** (credit card, bank transfer) to reduce churn linked to electronic check payments. Incentivize auto-pay (e.g., small discounts, reward points).
- **Engage new customers** with onboarding programs, discounts, or loyalty rewards to build long-term loyalty. Create onboarding programs, welcome offers, or personalized support to build loyalty quickly.

Recommendations

- **Improve Fiber Service Quality** Fiber optic customers show higher churn, suggesting dissatisfaction. Invest in service reliability, speed, and customer support for fiber users.
 - **Bundle Add-On Services** Customers with streaming TV, online security, or tech support churn less. Promote bundled packages to increase stickiness.
 - **Target High-Risk Segments** Seniors, monthly contract holders, and electronic check payers are at higher risk. Use targeted retention campaigns (special offers, proactive outreach).
 - **Simplify Billing & Payment Options** Reduce friction by making auto-pay the default option and streamlining billing. Customers frustrated with billing complexity are more likely to churn.
 - **Targeted Marketing Campaigns** Segment customers by churn risk and run campaigns (e.g., “Switch to annual contract and save 10%”). This aligns marketing spend with retention priorities.
- 

Thanks!
